

For Immediate Release

e-zynet Releases New EZ-Go[®] High Power AP/Client Bridge/Router System

Jan 9, 2009 - Draper, Utah – e-zynet announces the release of their new 250mW high power wireless EZ-Go[®] AP/Client Bridge/Router system specifically designed for wireless ISP's.

“The low installed cost, clean aesthetics and high performance make this system very useful for wireless service providers worldwide,” said Scott Parsons, COO. “With its high power output including a 14dBi high efficiency antenna, 15Mb/s thruput and state of the art software, the EZ-Go[®] will help WISPs expand their wireless systems while at the same time helping to reduce their installation costs.”

The new EZ-Go[®] system is housed in an attractive UV resistant and UL rated weatherproof housing with a powerful 14dBi integrated antenna and comes complete with a corrosion resistant bracket system for pole or wall mounting. Also included are a Power Over Ethernet (POE) power supply and CAT5e rated inserter to remotely power the EZ-Go[®] over the Ethernet cable. The system can accommodate an optional external antenna connector.

MSRP \$83

About e-zynet

e-zynet designs and manufactures both short and long range high speed wireless communications products.

The company's indoor and outdoor WLAN products are standards based to insure interoperability. In addition to a line of standard 802.11 products, e-zynet also develops customized wireless products to meet specific OEM customer requirements.

Headquartered in Veria, Greece, e-zynet also has offices and warehouse facilities in the USA and representatives worldwide.
