

RANGE:
above and beyond

Whether your application requires you to avoid the crowded 2.4 GHz frequency by *going above* with 5 GHz frequency band or the power to cover long distances by *going beyond* the 100 and 200mW devices with our **400mW** outdoor multi-purpose device; EnGenius can give you the performance you need.

EnGenius' EOC-8610 Ext features the latest Atheros chipset and our high-power radio (B/G ~ 400mW & A ~ 100mW) to provide unmatched performance. The outdoor EOC-8610 Ext offers the flexibility of a removable 4 dBi omni antenna, PoE injection, and Wireless Distribution System (WDS).

Demanding environments with varying temperature and weather conditions are no match for the EOC-8610 Ext robust mechanical design, waterproof housing, and wide temperature tolerance.

When deploying in highly concentrated wireless environments, utilizing the 802.11a mode will maximize performance, reduce potential interference and make your network less vulnerable to wireless network bandits. The 802.11a, 802.11b / g modes offer advanced security features including: EAP-TLS, 802.1x, and WPA/WPA2 providing protection for your network.

This unit, along with the entire EnGenius line, can easily be configured as an Access Point or a Client Bridge, further extending network communication use WDS without additional cabling cost. These capabilities allow wireless and seamless links in a building-to-building or building-to-multi-building solution. The EnGenius line is a great CPE choice for MESH environments and last mile solutions.

This product and many other EnGenius PowerGear wireless products can be found at our leading distributor, **Microcom Technologies Inc.** For pricing and availability contact Microcom Technologies at 1-818-880-8008 or sales@microcomtec.com.

Microcom Technologies is a leading distributor of wireless products for value added resellers. We offer products in a wide array of wireless categories, including long- range & outdoor, wireless VoIP, wireless surveillance, and wireless storage, just to name a few.

Microcom has the distinct ability and proven track record to deliver high-performance, hard-to-find product lines at very affordable prices. Our massive inventory and stock-on-hand is a virtual one-stop-shop for wireless resellers. This

versatility in our product offerings, combined with our commitment to uncompromising customer service, enables our clients to get the wireless components they need, the on-time delivery and support they deserve, and the savings they've always wanted.
