EnGenius Launches First Wireless "11N" Broadband Router With "Universal Repeater" & "Green Ethernet" Technology

Costa Mesa - EnGenius Technologies, Inc. today announced the release of their ESR-9750 and ESR-9750G Wireless "11N" Broadband Routers/Universal Repeaters.

"EnGenius is very excited to be able to provide an eco-friendly wireless router/repeater for the consumer market, while delivering 6X faster throughput speeds and 3X more coverage compared to standard 11g devices," said Roger Chien, Product Manager of EnGenius Technologies, Inc.

The ESR-9750 router features a built-in, 4-port, full-duplex 10/100 Fast Switch to connect your wired-Ethernet devices. The Router function ties everything together and lets your whole network share a high-speed cable or DSL Internet connection.

The ESR-9750G (Gigabit) router offers a built-in, 4-port, full-duplex 10/100/1000 Gigabit switch to connect your wired-Ethernet devices. The switch power is optimized for up to 10X faster data transfer than Fast Ethernet, making it an excellent device for power-users and multi-media applications.

By utilizing "Green Ethernet Technology", the EnGenius 11N wireless routers monitor power demand on each port and activate its "Power Save" mode when there is little or no demand. On the wireless side, if there is no demand from a wireless user's device, then the routers activate the "Power Save" mode on the wireless side as well.

With the easy-to-use Wi-Fi Protected Set-up (WPS) function, users connect to wireless devices with the push of a button. The provided, user-friendly web browser-based configuration utility make set up simple. To protect your data and privacy, both routers encode all wireless transmissions with WPA or 64/128-bit WEP encryption. With the ability to serve as your network's DHCP Server, the routers use a powerful SPI firewall to protect your PCs against intruders and support VPN pass-through. Both devices support home networking with superior throughput, performance and unparalleled wireless range.

EnGenius Technologies, Inc. has listed the features and benefits as follows:

- Wireless Speed 6X Faster
 - State of the Art 300Mbps wireless speed
 - Speed 6X faster than standard 802.11g
- Extend 3X Wireless Coverage
 - Multiple In Multiple Out (MIMO) antenna technology reduces

- dead spots and extends signal into hard to reach areas
- Unique Detachable Multi-Antenna Design
 - Upgradeable antennas to increase range and receive sensitivity
- Green Ethernet Enables Energy Efficiency
 - Designed to reduce power consumption and save cost (50% Energy Savings)
- Universal Repeater feature expands wireless coverage
 - Extends Wi-Fi signal into dead spots
 - Minimizes trenching and cabling cost
- QoS (Quality of Service) enhances multimedia applications
 - Ideal for VoIP, video streaming, and online gaming
 - Intelligent feature to prioritize video and audio connections
- Auto-Setup Wizard to ease setup
 - No technical knowledge required
 - Installation as easy as 1-2-3

The EnGenius Wireless 11N Broadband Router (ESR-9750) and 11N Gigabit Broadband Router (ESR-9750G) are backed by a one-year warranty and are available via select value added distributors, direct marketers, e-commerce sites, and value-added resellers at a retail price in the U.S. of \$69 and \$99, respectively.

For additional information about EnGenius' ESR-9750 and ESR-9750G Wireless 11N Broadband Routers/Universal Repeaters, or for resale information, please visit: www.engeniustech.com.

About EnGenius Technologies

EnGenius Technologies is a global technology innovator specializing in long-range telephone, data and VoIP communications. The company pioneered the "Affordable Long-Range Wireless" category with its award winning, long-range products which consistently outperform competitors' deployment coverage. Established in 1999, EnGenius Technologies, Inc. is a wholly owned subsidiary of Senao Networks, a Taiwan RF communications manufacturing company. EnGenius' wireless products are available through numerous distributors, system integrators, interconnect and catalogs.
